

## **Acupuncture Consent**

Acupuncture treatment involves the insertion of special needles into particular points on the body. There are some risks to this type of treatment, including the possible skin bruise, slight bleeding, feeling light headed or tired after treatment, and/or temporarily aggravation of symptoms. There is little to no risk of infection since all needles are sterile and disposable and one time use only. If you have bleeding disorder, or taking anticoagulant medication like Coumadin, may bruise easier.

I understand the risks and I voluntarily consent to this procedure.

## **Appointment Cancellation Policy**

I understand that unplanned issues can come up and you may need to cancel a scheduled appointment. If that happens, I respectfully ask that you cancel your appointment **at least 24 hours in advance**, allow enough time to give this slot to someone else.

Thank you for your understanding and support.

I understand and accept if my scheduled appointment is cancelled less than 24 hours, will be charged as a missed session.
